Integrative Tumor Epidemiology Branch

Education

Bachelor of Science in Biology, Minor in Spanish and Biomedical Research/ University of California, Los Angeles (UCLA)

Scientific interests

Cancer, imaging, autoimmune diseases, genetics

I applied to iCURE because...

I applied to iCURE because I believed it was the best next step to find mentoring in the science community. Not having or knowing many people in the field makes it hard to know what you are doing, and having a community to help guide you through it makes me feel more at ease.

A fun fact about myself is...

I would be a professional kickboxer/martial artist in another life

A few of my favorite things...

Most beautiful place I have traveled to is Alaska. I gone cliff jumping and rope swinging. I love watching Youtube.

In my spare time, I enjoy...

I love travelling, working out/being active, trying new food, coffee reviews, love going out with friends to play games or just have a good time! I am trying to become an avid reader/writer.

My hometown is...

I was born and raised in San Diego (very different than the East Coast weather I have to say). I actually haven't explored my own hometown too much, but I have to stay loyal to the best coast (West Coast)! The beaches are amazing.
