

Paloma Mitra

Post-baccalaureate
Integrative Tumor Epidemiology Branch;
Radiation Epidemiology Branch

Education

B.A., Public Health Studies from Johns Hopkins University

Scientific interests

Epidemiology, medicine, cancer survivorship and health disparities, women's health

I applied to iCURE because...

For the opportunity to return to NCI to continue developing epidemiology skills while refining my research interests. iCURE offers a cohort-based experience and I would love to experience having a network of like-minded peers during my time here.

A fun fact about myself is...

I've been on a magazine cover (this is a leading question, ask me about it).

A few of my favorite things...

I love anything my mother cooks, but even more if it comes with rice. I only like playing two video games (BOTW/TOTK) so they must be my favorites. I love snapdragons.

In my spare time, I enjoy...

I am constantly making something, so any derivative of crafting, sewing, baking "the more impractical the better" is how I fill most of my free time.

My hometown is...

Bay Area, California
