

Amy Yu

Post-baccalaureate
Pediatric Oncology Branch

Education

BA, Biological Sciences and Sociology,
Hunter College

Scientific interests

Cancer Biology, Translational Research,
Metabolism, Drug Resistance, Therapeutic
Development, Immunology, Tumor
Microenvironment

I applied to iCURE because...

I have learned the importance of community, support, and mentorship throughout my scientific career. iCURE offers a diverse community of scientists and mentorship that will guide me and take me closer to my goal of becoming a physician scientist. I applied to iCURE because of the opportunity to learn from scientists at the NCI and the ability to explore my research interests. The knowledge I learn and the support I gain through this experience will allow me to grow as a scientist.

A fun fact about myself is...

I was in a video that was published in the
New York Times Opinion section.

A few of my favorite things...

A warm chocolate chip cookie,
documenting my life in pictures, running
in Central Park, and ice skating in the
winter.

In my spare time, I enjoy...

I love to run and train for my next race. I love watching track and keeping up to date with the latest news in the professional running world. I enjoy spending time with family and friends and am always on the lookout to try new restaurants and cafes. I love to cook, bake, see the outdoors, and catch scenic views.

My hometown is...

Brooklyn, New York
