

Katelyn Garfinkel

Program Specialist, iCURE
Center to Reduce Cancer Health Disparities
NCI Shady Grove

Words to live by...

"The magic happens outside of your comfort zone."

What is your favorite thing about working at NCI?

Meeting people from various backgrounds and assisting them with reaching their goals. Many people don't know this, but if I was better at science I would have worked in oncology. So, by working here, I feel like I am assisting in making a difference.

In my spare time, I enjoy...

I like to bake/cook. I even applied to be on *Chopped* back in 2011. I also love to read and attend concerts/theatre shows with my husband.

My favorite traditions/holidays...

We have held a Friendsgiving the last four years. I love this tradition because I get to cook and celebrate the ending of the year with close friends.
