

Christine Muli, PhD

Postdoctoral Fellow
CCR Frederick

Education

PhD, Medicinal Chemistry and Molecular Pharmacology, Purdue University; BS, Biochemistry, California Polytechnic State University

Scientific Interests

- Chemical biology
- Discovery pharmaceuticals
- Biophysical chemistry
- Ubiquitin proteasome system
- Targeted protein degradation

I applied to iCURE because...

I was interested in being part of iCURE's community of trainees from diverse backgrounds, research interests, and training levels. The support of and training from the iCURE program will greatly help in my professional development towards my independent research career.

My favorite traditions/holidays...

New Year's Eve/Day; I love to celebrate with family and friends with a table full of home-cooked dishes.

My hometown is...

I was born and raised on the island of Guam. In high school, I then moved to central California.

In my spare time, I enjoy...

I love to travel with my partner and to play fetch with my rat terrier mixed dog named Moose. I also enjoy video gaming, cooking, and drawing/painting.

A few of my favorite things...

Lattes, wine, and the Pacific Northwest
