

Theodore Busby III, PhD

Postdoctoral Fellow
CCR Bethesda

Education

Ph.D., Biomedical Sciences, Biochemistry, and Structural Biology, University of Alabama at Birmingham

B.S., Biology, The University of Texas at San Antonio

Scientific Interests

Chromatin biology

I applied to iCURE because...

I applied to the iCURE program to join a supportive environment that would provide opportunities for networking and collaboration with scientists of underrepresented backgrounds.

My favorite traditions/holidays...

Thanksgiving

My hometown is...

Houston, Texas

In my spare time, I enjoy...

- Cooking
- Baking

A few of my favorite things...

- Tex-mex food
- Marvel movies
- Jurassic Park books and movies

Tom Misteli, PhD

Director, Center for Cancer Research
NIH Distinguished Investigator
Laboratory of Receptor Biology and Gene Expression
CCR Bethesda

Research Area...

Exploring how the human genome is organized and functions in space and time

Quote on imaging...

"Seeing is still believing. The microscopes we use to peer into cells are now as powerful as the telescopes used to explore the universe. And there is much to be discovered!"

Places I trained at include...

University of London, UK and Cold Spring Harbor Laboratory, NY

In addition to being an investigator, I am also...

Director of the NCI Center for Cancer Research
