

Amanda Sugrue

Postbaccalaureate
CCR Bethesda

Education

B.S., Biochemistry, Heidelberg University

Scientific Interests

- Cancer biology
- Cancer therapeutics
- Immunotherapy
- Pediatric oncology
- Neuro-oncology

I applied to iCURE because...

I applied to iCURE because I wanted to continue my research from last summer and I thought the program offered the best opportunities to grow as a scientist.

My favorite traditions/holidays...

Christmas

My hometown is...

Cincinnati, OH

In my spare time, I enjoy...

- Soccer
- CrossFit
- Biking

A few of my favorite things...

- Soccer
- France
- Mediterranean food

Ramaprasad Srinivasan, MD, PhD

Investigator
Urologic Oncology Branch
CCR Bethesda

Words to live by...

What is your favorite thing about working at NCI?

The ability to pursue ideas in the laboratory and in the clinic with the sole intent of improving the care of patients with cancer, unhindered by commercial or other extraneous considerations. The NIH is a very unique place, allowing investigators to pursue high-quality basic science and clinical research in a highly collaborative scientific environment in a manner few other institutions around the world can support. My work on finding new treatment options for rare forms of kidney cancer has been extremely gratifying and is an example of how basic science discoveries can be translated into effective treatment options.

In my spare time, I enjoy...

- Traveling both in the U.S. and internationally.
- Good food and trying different cuisines.
- Watching and playing cricket and tennis, and I am an avid fan of Jeopardy!

My favorite traditions/holidays...

- Diwali/Deepavali—an Indian festival that I associate most with getting together with family and friends
