

## Christina I. Schroeder, PhD

Chemical Biology Laboratory  
NCI Frederick

### Words to live by...

*The only time I set the bar low is for limbo.*

### What is your favorite thing about working at NCI?

Working with people from all over the world.

### In my spare time, I enjoy...

In my spare time I make my family eat my home baked sourdough bread and cakes, introduce my kids to food from all around the world, run miles around the neighborhood, go to the beach in summer, sledding and snowboarding in winter, read books every spare second and plan our next holiday. I have visited all seven continents, but still have many places left that I want to visit.

### My favorite traditions/holidays...

I enjoy the most getting invited to share and learn about other countries or culture's tradition. I am mostly interested in the food though. My favorite American holiday is thanksgiving, mainly for the turkey, but also because it is a time for family and friends to get together and share food without the necessity giving presents.
