

Mahider M. Enyew

Postbaccalaureate
NIH Campus, Bethesda

Education

B.S., Cell and Molecular Biology/MB3,
Towson University

Scientific Interests

Medicine, immunology, Cancer biology, cancer immunology, immunotherapy, cancer disparity research, infectious diseases (HIV, Malaria, coronaviruses, TB), precision medicine, genetic diseases.

I applied to iCURE because...

To get first-hand experience in biomedical research to prepare for my future career in the biomedical field. I also wanted to begin to develop my understanding of basic/translational research and clinical trials involved in the development of new drugs, vaccines, and medical/surgical interventions and treatments.

My favorite traditions/holidays...

My favorite holidays and associated traditions are Christmas and New Year's, both American and Ethiopian.

My hometown is...

I was born in what I consider my hometown, Bahir Dar, Ethiopia. I lived in Ethiopia up until I was 5 years old and then moved to Boston, Massachusetts with my parents. I stayed in Boston until I started high school, then halfway through my freshman year I moved to Bethesda, Maryland.

In my spare time, I enjoy...

I like to go on walks/hikes and all types of adventures to explore different places, museums, attractions, and shops, either with company or alone. I also enjoy reading or movie nights with my family.

A few of my favorite things...

Some of my favorite things include coffee and Ethiopian food, all types of marvel movies/shows, and taking scenic walks/hikes.
