

Dana M. Van Fossen

Postbaccalaureate
NIH Campus, Bethesda

Education

B.S., Biomedical Engineering, Rowan University, 2021

Scientific Interests

- Immunology
- Cancer Biology
- Stem Cells

I applied to iCURE because...

I applied to iCURE because I knew it would serve as the perfect transition between undergrad and grad school. It wasn't until my last semester of undergrad that I realized my passion for immunology research. The iCURE program gave me a chance to explore this area more in depth before continuing on with the next step in my career.

My favorite traditions/holidays...

My favorite holiday is New Years Eve. I love having a mix of both my friends and family in the same place to commemorate the previous year and welcome in the new one.

My hometown is...

I grew up in South Jersey, in a small town right outside Philadelphia

In my spare time, I enjoy...

I love to keep myself busy, so after work I enjoy rock climbing, hiking and yoga (a new hobby of mine!). I also love crafts. This past year I started bookbinding, painting, and beginners woodworking so I could make birdhouses. This year, I plan on spending my weekends exploring the DC area.

A few of my favorite things...

Some of my favorite activities include hiking, camping, and watching the sunset/sunrise.
