

Maxwell Hogshead

Postbaccalaureate
DCEG Shady Grove

Education

BS, Biology with minors in Public Health, Health Disparities, and Medical Anthropology, University of Florida

Scientific Interests

The interplay of molecular genetics, public health, infectious disease, health disparities, and anthropology. How do invisible forces such as DNA, pathogens, or culture affect our health?

I applied to iCURE because...

I wanted to be part of a diverse cohort of scholars, offering many different perspectives and approaches to the singular problem of cancer. Intersectionality is important to my career trajectory, and I see iCURE as the perfect environment to facilitate that growth.

My favorite traditions/holidays...

Late-summer oyster roasts at my family's lake house in Melrose, Florida

My hometown is...

I was born and raised in Jacksonville, Florida, the Bold New City of the South

In my spare time, I enjoy...

In my free time, I enjoy cooking, cycling, spending time with friends, scuba diving, reading campy sci-fi novels, and befriending stray cats on walks around my neighborhood.

A few of my favorite things...

Cooking for others; finding new music to love; a double-toasted everything bagel with schmear, tomato, red onion, and sturgeon
